

Precygn compressor subhalzer provides fast, efficient and reliable nebulized inhalation therapy, designed for home use. This is a quiet and hard-working compressor subhalzer suitable for nebulizing most aerosol medications prescribed for common respiratory diseases. It offers higher liter flows, shorter treatment times and lower sound levels than many other economy compressor subhalzers.

Detailed Description: Makes it extremely portable.

It is compact, portable, efficient, dependable and quiet.

Delivers consistent particle size of 4.5 microns and fast treatment times.

More Details

Micron level administration — 2µm–5µm
Nebulized particles directly reach the upper respiratory tract, trachea, bronchi and lower respiratory tract, making it easier to absorb the medication.

High atomization efficiency
Special atomization for continuous operation.

Low noise design
Low power, low vibration, baby atomization does not vibrate.
